

FIRE & SECURITY SERVICES

Trusted residential and commercial **fire & security contractors** serving Essex, London and the Home Counties.

Reliable Residential & Commercial Security Experts

Nomico is a reputable provider of fire and security services for residential and commercial properties, serving Essex, London, and the Home Counties.

We take pride in our extensive selection of commercial fire and security installation services, tailored to cater to our customers' requirements.

At our core, we take great pride in delivering tailored electrical, fire, and security solutions that cater to the unique requirements of our clients.

Experienced & Accredited

As a leading fire and security system installer we are BAFE registered and IFC Certified adhering to the highest standards and complying with all relevant safety regulations.

We are also members of the Fire Industry Association (FIA) and the Smoke Control Association (SCA) and are committed to meet and exceed our customers' requirements by providing high-quality fire and security installation and maintenance services.

We comply with all statutory and regulatory requirements, ensuring that our customers' expectations are consistently met and surpassed.

Our commitment to quality is unparalleled and our group of companies is also NICEIC approved and an ECA member.

We provide reliable fire alarms and detection systems that act quickly to protect your business.

Fire Alarm Systems

We understand that the protection of your business is of the highest importance. This is why we provide a wide array of fire protection solutions tailored to meet the specific requirements of your premises.

With our extensive selection of fire alarms and detection systems, we possess the knowledge and skills to protect your business against fire damage.

Our team of engineers is fully certified and consistently stays up to date with the latest fire safety regulations, ensuring that your business is in capable hands.

“ Proud to have Nomico as a work partner... they are a very proficient and professional provider in fire safety—*Steve Dilloway* ”

Certified Installers

We take pride in our accreditation for the design, installation, and maintenance of fire alarm systems, in accordance with BAFE SP203 standards.

This accreditation guarantees that our systems adhere to the highest levels of quality and safety.

Our team of skilled engineers possesses vast expertise in designing and implementing fire alarm systems. They are dedicated to delivering top-notch service to our clients.

We install smoke control systems to suit the required application in all types of buildings.

Smoke Ventilation Systems

If you need to upgrade an existing system during renovations or set up a new system in a new construction project, we provide supply, installation, and commissioning services for your smoke ventilation systems.

Our skilled engineers specialise in mechanical extract systems, car park ventilation, smoke vents, and dampers to deliver the most suitable system for your property.

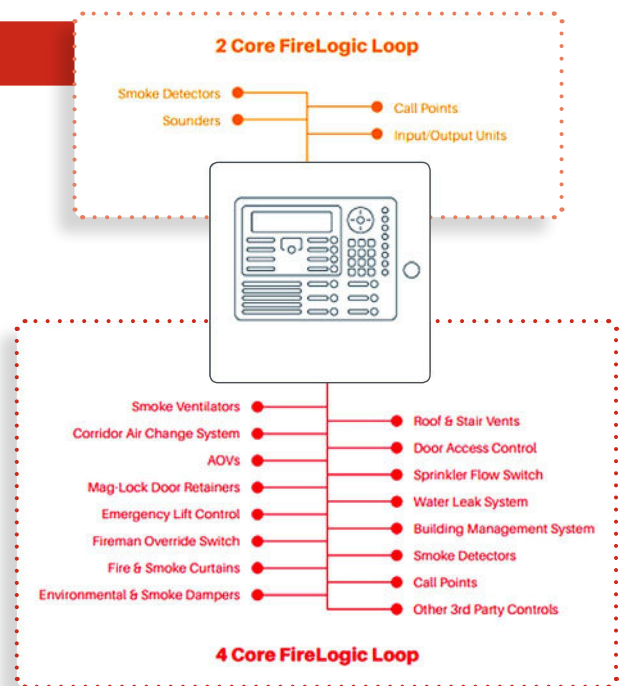

Our clients include architects, M&E contractors, property managers, local authorities, and residential customers.

FireLogic by Nomico

The FireLogic solution allows for easy monitoring of all relevant systems by an external alarm receiving centre, as well as internally by Nomico.

Our monitoring service ensures prompt activation of emergency assistance when needed, and also immediate identification of any faults or system issues for quick rectification, ensuring system and safety continuity

“Nomico is a great company. Very professional, with a fantastic team of people. It is an absolute pleasure to deal with them.” —Mandy

One Simple,

Streamlined Solution

We install premium systems like Advanced and Apollo into FireLogic. It's open protocol, allowing easy integration with components like Hochiki. This openness ensures any qualified fire alarm engineer can service and maintain the system, offering flexibility for third-party maintenance.

Reduce unauthorised access to your commercial premises with the latest access control systems from Nomico.

Keeping your Building Secure

Unauthorised entry to and from business premises can introduce various security threats. Aside from the risk of theft, it may also permit unauthorised individuals to access the building, leading to safety concerns.

Access systems can track entries and exits, simplifying the detection of any prohibited actions.

Furthermore, certain access systems can connect to security cameras, enhancing security measures.

Implementing an access control system can enhance premises security and discourage potential criminals.

PP Nomico F&S did an excellent job installing an access control system at my offices, they fully understood my needs in what I was trying to achieve, arrived very prompt and were professional at all times—*Andy Coggon* QQ

Keypads

Keypads serve as a straightforward yet highly efficient method for managing access to your property. By setting up a unique code on the keypad, you can ensure that entry is limited to individuals who are authorised only.

Biometric Systems

Biometric scanners represent a highly advanced security solution, employing cutting-edge technology such as fingerprint or iris recognition to accurately identify and grant access to authorised individuals.

This innovative approach ensures a robust and reliable means of authentication in various settings.

Our HD CCTV systems allow you to keep a watchful eye over your business 24 hours a day.

CCTV Design and Installation

We acknowledge the distinct security requirements of businesses, and our skilled team is committed to delivering a top-notch service to our clients.

Irrespective of your property's size or layout complexity, we have the capability to create and set up a CCTV system tailored to your needs.

We exclusively use cutting-edge technology to safeguard our clients' premises effectively while offering competitively priced services.

Nomico have always shown a great commitment to quality and supplied a high quality installation, whether it is CCTV, access control or fire alarm systems.—*Paul Young*

CCTV Maintenance

To maintain peak performance, it is crucial to conduct regular checks on system devices to ensure all components are functioning properly.

Our team of skilled professionals can detect and promptly resolve any system issues.

Additionally, we provide routine maintenance services to keep your system in optimal condition at all times.

Service & Maintenance

Full Service and Maintenance Packages

We offer full service and maintenance packages on all of our electrical, fire and security installations. Our expert engineers are trained and equipped to handle any issue that may arise, ensuring that your systems are always operating at their best.

We offer maintenance and breakdown coverage to our diverse customer base, including offices, residential buildings, commercial properties, construction sites, and factories.

Our Nomico Helpdesk & Support facility supports this service, assigning a unique log number to each case for easy tracking until resolution.

We find Nomico an extremely helpful company who are very reactive, especially when emergencies arise.—*Ian Gibbs*

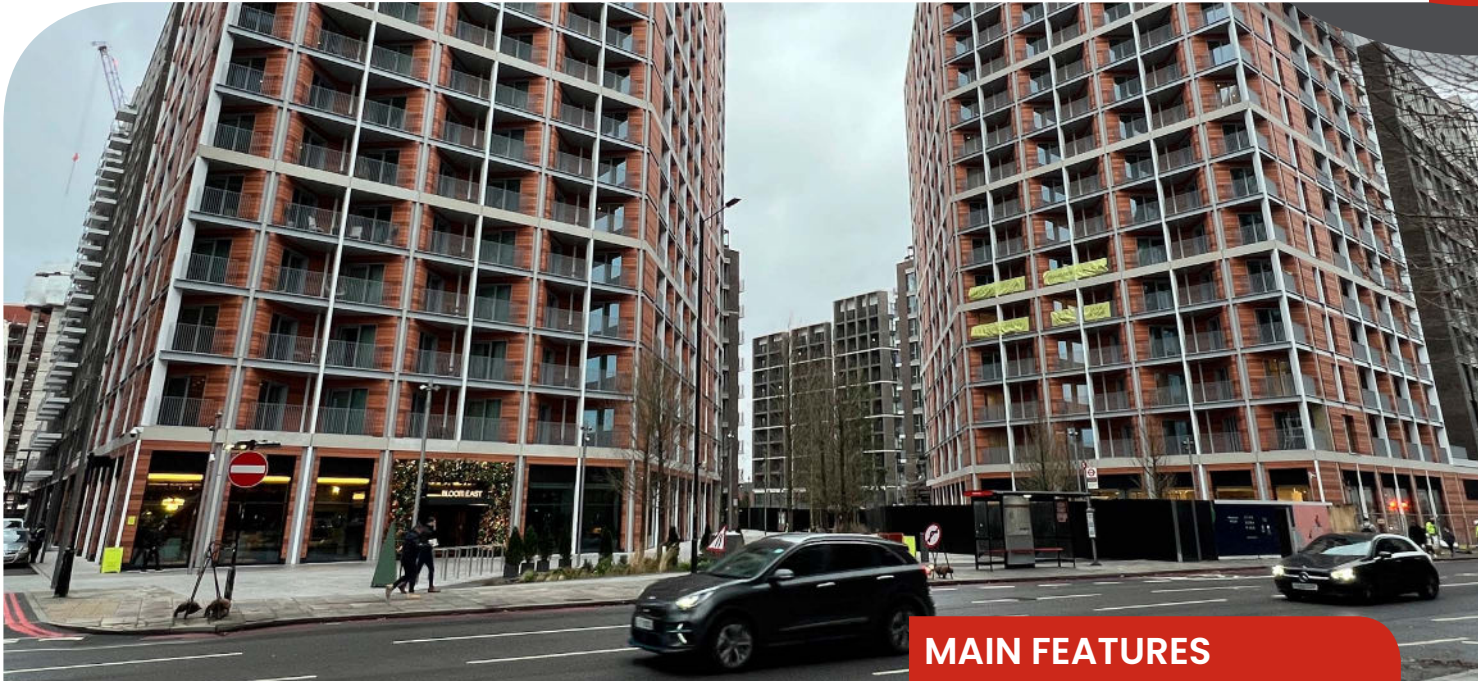

24/7 Maintenance and Breakdown

Covering London and the Home Counties, Nomico offers around-the-clock fire and security maintenance services, including CCTV, Door Entry Systems, and Fire Alarms.

At any time of the day, we will assess the issue promptly and address it accordingly. Our priority is to ensure that your business remains safe and secure at all times.

MAIN FEATURES

MAIN FEATURES

- 1 Fire Alarm Systems
- 2 Smoke Extraction Systems
- 3 Lighting Control System

Electrical and security installation for a 261 apartment development.

The Lark consists of 261 apartments by Galliard Homes, spread across 3 blocks with 195 private and 66 rented dwellings. We **completed the entire electrical setup** of the apartments and infrastructure works, including mains distribution for residential and landlord services.

Nomico took on **complete design and installation duties** for the **fire alarm system** and **smoke extract systems** in the apartment blocks. Additionally, we managed the installation of car park ventilation through one of our trusted contractors, PVE.

Electric Vehicle charging points for the ground floor car park were installed as well as a complete scene setting lighting control system in the ground floor main entrance area.

MAIN FEATURES

- 1 Fire Alarm System with linear heat detection
- 2 CCTV System
- 3 Electrical Systems

Full electrical and security and fire alarm system installation for the refurbishment of a 146 apartment block.

We have successfully installed all necessary electrical systems and a state-of-the-art fire alarm system complete with linear heat detection specifically tailored for the underground car parks.

We also installed a comprehensive CCTV system for enhanced security monitoring, a sophisticated door entry system for controlled access, and meticulously designed external lighting fixtures to illuminate the surroundings effectively.

This project features a main tower with 146 flats and a utility tower featuring 10 rooms spread across various levels. These rooms include a gym, cookery room, dining room, workshop, cinema room, music room, and more for residents to enjoy at their convenience.
